Core Skills

Frontend

Vue.js • JavaScript • HTML5 • CSS3 • Bootstrap

Backend

REST APIs • Laravel • Express.js • .NET

Database

MongoDB (Atlas Search) • MySQL

Mobile

Flutter

DevOps & Tools

Docker • GitHub Actions (CI/CD) • Git

Practices

Agile delivery • API design • production troubleshooting • technical documentation

Profile

Full Stack Developer with 3+ years of experience building and supporting production web and mobile products end to end. Owns features from implementation through deployment and production support — across admin platforms, mobile apps, backend services, and third-party integrations. Experienced in agile, cross-functional teams with a practical build-test-run approach to delivery, debugging, and release support.

Employment History

Full Stack Developer — Nextale, Petaling Jaya

SEPTEMBER 2024 — PRESENT

- Owned delivery of back-office features on a Vue.js + Laravel admin platform — including voucher distribution, referral settings, commission settings, and payment admin workflows — improving validation rules, admin usability, and system reliability.
- Led end-to-end implementation of Foodtale mobile features including discover/search feeds, review creation, deep links, shared restaurant tracking, and order confirmation — coordinating Flutter UI, API integration, and production fixes.
- Improved restaurant and content discovery by designing search ranking logic (relevance, engagement, recency) and paginated discover APIs used in live mobile feeds.
- Built and supported a UOB bank payment integration using ISO 20022 XML (outbound payment file generation and inbound response processing), including file exchange, encryption, audit logging, and webhook callback handling.
- Maintained and extended REST APIs across admin, identity, ordering, and management services — ensuring consistent validation, integrations, and service behavior for web and mobile clients.
- Delivered a payment callback proxy to route third-party POST responses into mobile deep links, enabling reliable order confirmation after external payment events.
- Supported team release readiness by resolving Docker and GitHub Actions pipeline failures, keeping Flutter web and Laravel services buildable and deployable.
- Investigated and resolved cross-stack production issues during live user flows, spanning admin UI, mobile app, backend services, and database behavior.

Business Architecture Analyst — Accenture, Kelana Jaya

MARCH 2024 — MAY 2024

- Identified and fixed bugs in a web-based distribution management system, improving system stability and user experience.
- Provided L1–L3 technical support, troubleshooting application and system issues and coordinating timely resolution with stakeholders.

Web Developer (Part-Time) — Nextale, Petaling Jaya

OCTOBER 2023 — DECEMBER 2023

- Built an event seating arrangement module for an RSVP web application using Vue.js and Laravel across frontend and backend layers.
- Integrated third-party npm libraries to deliver new UI features and streamline frontend development.
- Optimized application performance by resolving bottlenecks that affected responsiveness under load.

Consultant, Solution Development — Fusionex Group, Petaling Jaya

JULY 2022 — FEB 2024

- Designed and shipped full-stack features for data visualization software (GIANT) using .NET and Knockout.js.
- Partnered with cross-functional teams in an agile delivery setting to gather requirements and release production-ready solution increments.
- Built a forecasting module for construction project fee estimation, reducing manual effort and errors by **20%**.
- Mentored interns through code reviews, technical guidance, and hands-on feature development support.

Education

Bachelor Of Information Technology (Honours) – Internet Technology

Tunku Abdul Rahman University of Management and Technology, Kuala Lumpur

JUNE 2020 — JULY 2022 | CGPA: 3.68
